

Save Time

Applying grease manually takes time and is messy. Gear Head fifth wheel grease pads make application easy, clean, and fast.

Environmentally Safe

Soy based formulation is safe for the environment and biodegrades unlike traditional petroleum based grease products

Save Money

Fast, easy, controlled application wastes no grease making it very cost effective.

5th Wheel Grease Re-Invented

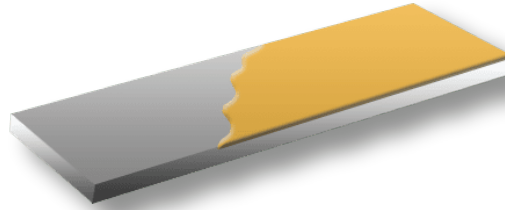

POWERED BY SOY

Gear Head fifth wheel grease pads make fifth wheel lubrication easier and better than ever! Non-toxic and renewable, these 5th wheel grease pads are cleaner, easier to apply and reduce waste when compared to traditional petroleum based fifth wheel grease packets.

You get 6 easy-to-use grease pads per box. Each pad contains a proprietary, high-performance, grease formula that outperforms the best petroleum based fifth wheel lubricants. The pads are encased in a clean smooth coating that blends into the grease when the fifth wheel is attached to the trailer.

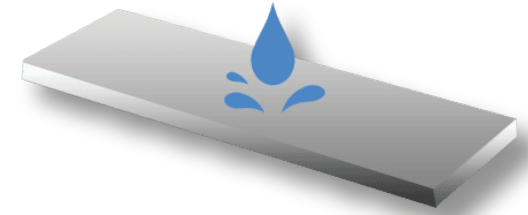

SOY OIL IS SUPERIOR OIL

Polar End Bonds Tight

Gear Head's high polarity creates a stronger bond to metal, allowing full lubrication and stronger attachment petroleum products can't achieve.

Non Polar End Repels Water

Gear Head's non polar end creates an unmatched water barrier, making it the absolute best technology for preventing the damaging results of rust and corrosion.
